2015

4.298B

2016

4.121B

*Funds are reducing as targeted number of deliveries
is increasing*

The estimated number of deliveries provided in the CARB bill is 737,607 (which is supposedly the number of deliveries both at county and national health facilities in 2014/2015). The figure provided by the president of 1.2 million, therefore, overestimates the expected impact of the program by over 450,000 women as per the planning documents.
